WORK EXPERIENCE

Product Stack (*SDE intern*)

June 2024 - Present

- Developed **AWS Lambda functions** to receive vendor details from the client-side front-end and authenticate **AADHAR, PAN, and GST information** using **Signzy services** via **RESTful APIs** for risk management and **KYC verification**.
- Devised a solution to securely store authenticated vendor data in **AWS S3 buckets**, ensuring **data integrity** and **compliance with security standards**.

MyFab11 (*SDE intern*) [[Certificate](#)]

January 2023 - May 2023

- Implemented **TrueCaller SDK**, reducing manual verification time by **40%** and increasing new user sign-ups by **25%**, boosting revenue.
- Engineered a **backend-controlled tooltip system** using **MVVM (Model-View-ViewModel)** architecture, reducing **code redundancy by 30%**, enhancing maintainability.
- Launched a **rating feature** focusing on **user experience**, resulting in a **25% surge** in user engagement and a **10% boost** in overall app ratings.

PROJECTS

ExitPro | *Android Studio, XML, Kotlin, TypeScript, MongoDB*

🐙: github.com/sayak22/ExitPro/

- Automated student entry and exit logging using **barcode-based logging**, boosting efficiency by **70%** and reducing wait times by **50%**.
- Secured entries and exits, preventing unauthorized access, **Fingerprint authentication** increased accuracy to **95%**, and the **OTP based authentication** system reduced unauthorized attempts by **80%**.
- Minimized administrative workload by **50%**, replacing paper methods with digital, Applied **Retrofit** for API fetching and **RecyclerView** for log display.

Leafify App | *Java, XML, Android Studio, TensorFlow*

🐙: github.com/sayak22/leafify/

- Engineered a Java-based Android app for leaf health classification (Healthy & Diseased) with an **accuracy of 95%**.
- Optimized **TensorFlow Lite** usage, reducing prediction latency by **20%** and improving overall application responsiveness.
- Upgraded features, **increasing user satisfaction by 30%** for capturing or uploading leaf photos and efficient health predictions.
